# Memory for Learning

'Memory for Learning' is a 3-day programme designed to support schools to develop evidence-informed approaches in order to improve teaching and learning and student outcomes. It is for staff from EYFS to KS4 who have a responsibility for and/or interest in improving learning for pupils.

'Memory for Learning' is founded upon the best evidence that has been gathered by globally renowned researchers and areas of focus include retrieval and spaced practice, interleaving, dual coding and knowledge organisers.

## Why take part?

To understand the cognitive science behind learning so you are able to apply this knowledge to:

- Curriculum planning
- Influencing pupil learning behaviours
- Increase knowledge of cognitive science
- Reflect on current practice
- Apply cognitive science evidence to your own teaching practice
- Implement changes across the school/department

| Costs | Dates |
|-------|-------|
| £295 per person | 24/02/2022, 24/03/2022, 28/04/2022, 19/05/2022 |
